

2nd DEPLOY Plenary Meeting – Technical Workshop

October 21-23, Aix-en-Provence, France

wiki.event-b.org/index.php/DEPLOY_Plenary_Workshop_2009

Call for Papers

The second DEPLOY annual plenary meeting will be held this year from the 21st to the 23rd of October 2009 in Aix-en-Provence, France. The main difference with respect to the past meeting will be in a significant amount of time dedicated to technical presentations of conference-like papers. We invite all the academic and industrial partners to submit papers about the work they carried on inside the DEPLOY project. We expect to have submissions belonging to the following categories and we will give to any of these a space proportional to the number of papers received:

1. **Full Original Papers (FOP):** these are works that have never been submitted before to any other workshop/conference/journal but they have to be about ideas that have passed their seminal form. We suggest these papers should be contained in 12 pages LNCS format.
2. **Full Published Papers (FPP):** these papers may have already been published in any workshop/conference proceedings or journal but the authors intend to submit them again for educative or promotional purposes inside the DEPLOY community. Copyright is not an issue since the work will not be formally published and the presentation will remain internal to the project. We suggest these papers should be contained in 15 pages LNCS format.
3. **Short Abstract Papers (SAP):** these papers present unpublished ideas that are still in their seminal form and want to be presented by the authors to receive feedback before going on with proper full papers. We expect these papers to be presented in a known/unknown form with a number of open questions for discussion. We suggest these papers should be contained in 6 pages LNCS format.
4. **Tool Demo Papers (TDP):** these papers present works done on tools. A demo is thus expected. We suggest these papers should be contained in 6 pages LNCS format.

Please note that the DEPLOY plenary meeting is a DEPLOY internal event. Therefore we can only accept papers from official DEPLOY members.

Submissions: The papers should be formatted according the LNCS format and submitted electronically via the EasyChair. All Details can be found [online](#). If there are any questions or problems, please contact [Manuel Mazzara](#).

Confidentiality: We understand that it is not always possible to share your work freely. Please mark your paper as Public, Reserved or Confidential, as described in more detail [online](#).

Publication: There will be a post-workshop version of the papers to submit. We will publish a proceedings of the workshop as a Technical Report at the Newcastle CS school. Authors may opt out to publishing their work.

Important Dates

- 11 September 2009: Papers submission
- 30 September 2009: Announcement of accepted papers
- 21-23 October 2009: DEPLOY Plenary Meeting in Aix-en-Provence
